Job Shack Plugin

Copyright 2005-2007 Barry Keal Released under GPL
Support only at www.keal.me.uk
For e107 v.7.x only

Version 1
This is a job shack plugin that allows users to create and maintain adverts on your web site.
Users can upload a document (for example an application form or person specification) to go with
the advert and select one of several graphics counters if they wish.

Installation

Copy to plugins directory
Go to the plugin manager and install.

Then configure the options. Create your terms and conditions e.g. tell people you are not
responsible for the goods being sold plus any other disclaimers you may wish to add.

Create categories and sub categories. You need at least one sub category per category.

As admin, you can create adverts on behalf of users or edit them with the Administer Vacancies
option. You can also change the expiry date and approve them individually from here.

Admin can manage documents, adverts etc.
If you don't want the logo at the top of the adverts then remove the shortcode from the template,
alternatively, create your own replacement with the same name.

Adverts that have expired are not automatically deleted, they are just hidden. If you wish to purge expired adverts go to Purge expired Ads and select those you want to get rid of. You can re approve the adverts if you want. The expiry date will be today plus the default "show time."

If you require adverts to be approved before display (see main config) you can display all those that need approving. You can select them to be approved or deleted as you wish.

The administer documents admin option will give a list of documents in the documents directory that are not associated with an advert, select those that you wish to delete and click on Update.

This plug-in works with the "List New" plug-in which is in the core of e107. See that plug-in for details. It also works with the notify function in e107 core. See that for details.

If you are storing documents on the server you will need to ensure permissions are set correctly for the documents folder (eg chmod 777)

Create RSS data entry in the RSS plugin. For more info on RSS see that plugin.

Version History

Version 1.5
Small bug fix release

Version 1.4
Small bug fix release

Version 1.3
Fixed some date issues
Fixed problem with showing nextprev
Can now review job direct from submissions
Fixed filenames breaking theme in admin
Fixed RSS Links
Fixed some other bits I didn't know were broken
Fixed bug in newsletter

Version 1.2
Fixed bugs where not logged in not showing ads and not logged in shows manage my ads and subscription buttons (You can't do either unless you are logged in)

Version 1.01
Initial design – Thanks to Crow for the help in debugging and in many suggestions for the requirements of this plugin.

To Do

Nothing really unless you have other ideas.

Shortcodes and Templates

Shortcodes are used in the various templates. You can redefine the template to tailor the look of you job search plugin.

JOBPOSTDATE=stringDate Format

This displays the date the vacancy was posted. The parameter is either long, short format or blank it formats the date in the setting defined in e107 admin preferences. You can pass a php date format string to override the format.

JOBSUBLIST
Display a drop down sub category list or list of text links to sub categories (Set in the plugin's config.)

JOBCATNAME=(string)Link

Display the category name. If the parameter is nolink there will be no anchor created.

JOBCATDESC
Display the category's description

JOBCATICON
Display the category icon (with a link to the category if appropriate). If no icon specified or it does not exist then blank icon is displayed.

JOBSUBNAME=(string)Link
Displays the sub category name. If the parameter is nolink there will be no anchor created.

JOBSUBJOBCOUNT
Displays the number of vacancies in the sub category.

JOBSUBICON
Display the sub-category icon (with a link to the sub-category if appropriate). If no icon specified or it does not exist then blank icon is displayed.

JOBLOCALSELECTOR
Displays a drop down containing a list of localities. On changing the selected item it will submit the current form thus changing the selection.

CURRENCY_SYMBOL
Displays the currency symbol set in admin config.

JOBTITLE
The title of the vacancy.

JOBSALARY
Displays the salary being offered in the vacancy. If no salary specified the message Not specified is displayed.

JOBCOMPANY
Displays the name of company advertising the vacancy.

JOBEMPLOYERDETAILS
Displays the extended details about the company advertising the vacancy. If none specified then

blank.

JOBEXPIRES=stringDate Format

Displays the closing date of the vacancy if specified. The parameter is either long, short format or blank it formats the date in the setting defined in e107 admin preferences. You can pass a php date format string to override the format.

JOBDETAILS
Displays extended details about the vacancy.

JOBPHONE
Displays the company's phone number. If blank the message No phone number has been given is displayed.

JOBEMAIL
Displays a contact email address for the advertiser. Javascript is used to obfuscate the address to spam bots. If blank No email address has been given is displayed.

JOBDOWNLOAD
Displays a link to additional documentation. If no associated document There is no additional information available is displayed.

JOBTC=(string)button
Displays the job terms and conditions button. Clicking on this displays the T&C set in admin config. If button is the parameter then a button is displayed else a text link.

JOBLOGO
Displays the logo for Job Shack.

JOBUPPAGE=(string)icon
Displays an icon or link to the previous level of Job Shack. If icon is passed as a parameter a picture is displayed otherwise a text link is shown.

JOBEMAILLINK=(string)icon
Displays an icon or link to the email to a friend. If icon is passed as a parameter a picture is displayed otherwise a text link is shown.

JOBPRINT=(string)icon
Displays an icon or link to a printer friendly page. If icon is passed as a parameter a picture is displayed otherwise a text link is shown.

JOBTERMS
Displays the T&C specified in admin config.

JOBMANAGE=(string)button
Displays a link or button to manage your ads. If button is the parameter then a button is displayed else a text link.

JOBSUBSCRIBE=(string)button
Displays a link or button to manage users newsletter subscription. If button is the parameter then a button is displayed else a text link.

JOBSUBME
Displays a check box which a user can subscribe/unsubscribe to newsletter.

JUBSUBOK
Submit button for subscription form.

JOB_NUMBER
Displays the number of new vacancies since last newsletter.

JOB_JOBSEARCHURL
Displays a link to the job shack plugin for the newsletter

JOB_JOBSEARCHUNSUBURL
Displays a link to the subscriptions for the newsletter.

JOBTODAY=stringDate Format
Displays today's date for the newsletter.
The parameter is either long, short format or blank it formats the date in the setting defined in e107 admin preferences. You can pass a php date format string to override the format.

JOB_JOBSENDER
Displays the from name in the newsletter as set in the plugin's config.

JOB_MOREINFO
Link for more information. Used in newsletter template.

JOB_NEXTPREV
Displays the next previous link according to the setting in the e107 admin preferences.

JOBLOCALITY
Display the locality the job is in or all areas.

JOBVIEWS
Display the number of times this vacancy has been displayed. If turned off in admin config displays Counter Disabled

JOBREFERENCE
Displays the unique system reference for the vacancy.

JOBEMPREF
Displays the employer's reference for the job.

Just for Info

I use PDFCreator from http://sourceforge.net/projects/pdfcreator/ as the PDF creator, a great free and comprehensive utility.

For editing I use PHP Edit from http://www.waterproof.fr/
